Product Information & Ingredients

night cream lauren murphy

Recommendations For Use

lauren murphy, Night Cream Instructions, use at night after cleaning your face and cleansing. I would recommend using a small amount and dotting it over your face then massaging this into your skin. Only apply a very thin layer to the areas you feel are oilier (e.g. T-Zone). I have used oils that will balance sebum production and oils that have a lower comedogenic rating so your pores do not get clogged.

For Best Results

It is recommended that you strip back your skincare routine to the basics and start with a blank slate. It is also recommended that you do not use other new skincare products while you are testing our products on your skin. The reason for this is you will not really know which of the products caused a reaction if you introduce too many at one time. If you usually do not have a problem with reactions on your skin, you should not have a reaction.

Care & Storage Instructions

Store below 25 degrees celsius. Keep out of direct sunlight. Store in a dry place. Do not allow water to enter your product.

Directions & Warnings Before Use

Apply a patch test first in the area of use. Stop using this blend immediately and seek medical advice if you have an allergic reaction or it causes irritation. For external use only. Keep out of reach of children.

Our promises to you

We go to great lengths to hand select every ingredient. Please do not hesitate to let us know if you are not having the desired effect after using this product for the first 6 weeks. We will ensure that we analyse your needs further and make the necessary adjustments to your formulation. We select only natural and organic ingredients in order to formulate products that are not only gentle on your skin but are also effective. Each of our ingredients goes through a selection process to ensure the highest quality. Please do not hesitate to contact us if you have any questions or concerns about any of our products. We would be happy to help.
